Lexan® Margard®

Polycarbonate Sheet
for safety and security glazing

Lexan

Trust Lexan® Margard® sheet for high performance, attractive appearance

Lexan Margard sheet offers excellent optical clarity with a unique combination of properties, which make it the ideal choice for safety and security glazing to suit a wide range of applications.

Available clear or bronze tinted, in standard and formable grades, it can be specified for both flat and curved glazing.

● Extremely high impact resistance

Like all Lexan sheet products, Lexan Margard sheet offers extremely high impact resistance, minimising the risk of breakage - even when subjected to violent blows by heavy objects.

This impact resistance does not vary significantly over a wide temperature range (-40°C to +120°C) or after prolonged outdoor exposure.

● High resistance to abrasion

Lexan Margard sheet has a unique, hard surface coating which provides a high level of protection against unsightly scratching, so it's ideal for use in applications where frequent contact is likely.

● High resistance to the effects of weathering

The surface coating of Lexan Margard sheet enhances protection against

performance losses and yellowing caused by exposure to UV radiation in sunlight.

● High resistance to chemicals

Lexan Margard sheet is immune to contact with many chemicals such as cleaning fluids, paints and adhesives. Its unique surface coating also resists graffiti, enabling easy restoration to a 'good as new' condition.

The wire wool test shows the superior performance of Lexan Margard sheet over conventional, uncoated sheet.

The surface coating of Lexan Margard sheet resists graffiti and allows easy restoration.

Lexan Margard sheet outperforms most other thermoplastic glazing materials in fire tests.

e and excellent all-round durability.

- **Superior fire performance**

Unlike many thermoplastic materials used for glazing, Lexan Margard sheet receives high ratings in the major European standard fire performance tests.

- **Safe and easy to handle and install**

Lexan Margard sheet is very light and can be cut to size on-site using conventional workshop tools, allowing reduced lead times for re-glazing.

- **Comprehensive warranty**

Lexan Margard sheet is backed by a five years limited warranty against loss of light transmission and coating failure - and by a ten years warranty against breakage. See warranty for exact details.

Lexan

A cost effective solution to glazing in areas prone to vandalism: re-glaze just once with Lexan Margard sheet.

No shattering or splintering: Lexan Margard sheet is the safe option.

Trust Lexan[®] Margard[®] sheet for safety and security glazing.

● Anti-vandal glazing

Glazing with Lexan Margard sheet is the ideal solution in areas where there may be a risk of vandalism. It minimises the risk of costly re-glazing and allows frequent cleaning or removal of graffiti without causing damage.

● Security glazing

Lexan Margard sheet will prevent a burglar from forcing an entry. It will delay him to a point where he simply gives up the attempt, or is detected. Either way, the premises and property are protected and re-glazing costs are eliminated.

For high security applications where there may be a risk of armed assault, the

Lexgard range of ballistic laminates is available. For further information, please contact GE Structured Products.

● Premises safety glazing

Lexan Margard sheet will not shatter or splinter, so greatly reduces the risk of accidental injury in applications like internal partitions and doors.

● Safety screens and acoustic screens

Lexan Margard sheet is the ideal material for safety screening in sports stadia and other outdoor applications like acoustic screens for deflection of traffic noise in built-up areas.

Lexa

Trust Lexan® Margard® sheet

...for machine tool safety guarding...

Glazed safety guarding using Lexan Margard sheet not only protects machine operators against injury. It allows the clearest possible view of the workpiece, even after prolonged regular contact with oil, coolants and other materials - including cleaning fluids.

Lexan Margard sheet meets or exceeds established and preliminary European safety standards - and its impact strength is unaffected by high temperatures.

...and for vehicle safety glazing.

The unique combination of light weight, impact strength and resistance to abrasion and weathering, makes Lexan Margard sheet an excellent material for vehicle glazing. It has been proven in use on a wide variety of vehicles from fork lift trucks to forestry tractors. In fact, wherever high visibility and driver protection are priorities, Lexan Margard sheet provides the effective solution.

The Lexan® Margard® sheet range

Four different grades of Lexan Margard sheet are available:
Lexan Margard MR5E sheet for flat glazing applications - coated both sides.

Lexan Margard FMR5E formable sheet for curved glazing applications - coated both sides.

Lexan Margard HLG5 sheet for use as a glazing laminate in flat applications - coated one side only.

Lexan Margard FLG5 formable sheet for use as a glazing laminate in curved applications - coated one side only.

Availability

Grade	Standard size (mm)	Thickness (mm)	Standard colour
MR5E	2000 x 3000	3, 4, 5, 6, 8, 9.5 and 12	112 (clear), 5109 (bronze)
FMR5E	2000 x 3000	3, 4, 5, 6, 8, 9.5 and 12	112 (clear), 5109 (bronze)
HLG5	2000 x 2920	3, 4, 5, 6, 8, (9.5 and 12 optional)	112 (clear)
FLG5	2000 x 2920	3, 4, 5, 6, 8, (9.5 and 12 optional)	112 (clear)

Advanced solutions from a trusted world leader

GE Structured Products is the sheet and film division of GE Plastics, with European headquarters in the Netherlands and additional manufacturing operations in Italy and Austria, as well as sales and marketing facilities throughout Europe.

GE Plastics is part of the General Electric Corporation - a global engineering company, manufacturing products as diverse as jet engines, medical equipment and consumer white goods.

As the leading supplier of high performance engineering plastics to

markets in Europe, the United States and Asia Pacific regions, we operate a worldwide network of research, manufacturing and technical service facilities.

Quality is our culture

GE Structured Products operates a comprehensive Total Quality Management system within the procedures of ISO 9000, for which we carry full certification.

Our commitment to quality is evident in all aspects of our organisation, from manufacturing to sales and marketing, with strong emphasis on personal accountability.

All information, recommendation or advice contained in this document or given by General Electric Company*, USA, or any of its subsidiaries, affiliates or authorised representatives, whether written or oral, is given in good faith, to the best of its knowledge and based on current procedures in effect. The products of General Electric Company or, if applicable, of its subsidiaries or affiliates are sold subject to Conditions of Sale, printed on the back of order acknowledgements, invoices or available upon request. Nothing in this or any other document shall alter, vary, supersede or operate to waive any of the Conditions of Sale. Each user of the products shall convince himself, through all available sources (including finished product testing in its appropriate environment) of the suitability of the products supplied for its own particular purpose.

Because actual use of the products by the user is beyond the control of General Electric Company, its subsidiaries and affiliates, such use is within the exclusive responsibility of the user. General Electric Company, its subsidiaries and affiliates cannot be held responsible for any loss incurred through incorrect or faulty use of the products.

Information, recommendation and/or advice are neither made to infringe on any patents, nor to grant a license under any patent or intellectual property right of General Electric Company or any of its subsidiaries or affiliated companies, nor to grant the right to file for any patent protection.
